

Temporary power storage at construction sites

How do I get temporary power to my construction site?

Getting temporary power to your construction site is an involved process. Once you vet different power companies and approve a quote, the temporary power poles need to be installed and there are permits and inspections that need to take place. In order to get power to your site quickly, be prepared for the following steps to occur.

What is temporary power for construction sites?

Temporary power for construction sites is a temporary electrical infrastructure that supplies power to construction equipment, tools, lighting and other necessary facilities during the construction phase.

How does temporary power planning work?

On projects where temporary power is being outsourced, a consultant or engineer from the power company will come and tour the construction site to help design the power layout. During the site inspection, the temporary power planning team should make sure to take account of the existing utility sources around the site.

Does a construction site need temporary power?

Without temporary power, most construction sites would be at a standstill. Most of the machinery, tools and equipment you use throughout a project need a power source, but what are the best temporary construction power options for your needs?

Why does my construction site need a temporary power delivery?

At some point, every jobsite requires some temporary power delivery. One reason may be because permanent utility power has not yet been installed on your construction site. You could also need power delivered to a hard-to-reach location, or power at the site isn't sufficient for extra tools, lighting, or trailers.

How does temporary power installation work?

On many construction projects, temporary power installation is contracted out to a dedicated power specialist, so if this is the case, representatives from that company will be integral to the planning process. This stage is where a thorough site analysis is conducted to check for any potential electrical problems or hazards.

Whether your project will last a few weeks or a few years, you need a durable, powerful power system to get you through each day. With many options for construction site temporary power ...
