How long does a portable power station last?

One cycle means using the product from fully charged to zero charge (or at least 80% in some cases). If you use your portable power station several times a week, it might only last a year or two. If you use it less frequently, it could last for much longer. What can you run on a portable power station?

How to choose a portable power station for camping?

Setting one up inside a home or workshop means close quarters, and loud models could literally require hearing protection. A portable power station for camping should also be quiet, or else it may disturb the neighbors. Typically, electric and solar power stations make for the quietest generators available.

How much does a portable power station cost?

When choosing portable power stations for this list, we wanted to offer a variety of choices that will fit both your needs and your budget. Small, basic power stations start around \$500, but larger models can cost over \$3,000. We included options at both ends of this range, as well as a few middle-of-the-line choices.
