Mjolnir is a hammer, and was enchanted by Thor's father, Odin, so that only those the hammer deemed "worthy" are capable of wielding or even lifting it. Stormbreaker is an axe, and although it does not have such a worthiness enchantment, its power is such that a mere mortal attempting to wield it would be driven mad.

Throughout the history of mythology, probably no single weapon is as well known as the thunder god Thor's hammer Mjölnir. In Greek mythology Zeus has lightning bolts, and Hercules has a giant club. However, both pale in comparison to the mightiest weapon found in Norse mythology.. Not merely a weapon, Mjölnir can also be used to resurrect animals.

Electrochemical energy storage (EcES), which includes all types of energy storage in batteries, is the most widespread energy storage system due to its ability to adapt to different capacities and sizes []. An EcES system operates primarily on three major processes: first, an ionization process is carried out, so that the species involved in the process are ...
