The new load switch ICs offer reverse current blocking and a thermal shutdown function. In addition, they feature ultra-low switch ON resistance, low quiescent current and a wide input voltage operation from 1.1 V to 5.5 V. Switch ON resistance is only 8.3 m Ω ; at 5.0 V and -1.5 A for load conditions.

Hitachi Energy offers a comprehensive range of high-voltage switchgear and breaker solutions up to 1200 kilovolts AC and 1100 kilovolts DC. ... Toshiba Electronic Devices & Storage Corporation provides helpful reference designs relating to its power semiconductors. The company can also provide design support depending on the particular situation. In the following article, an example will be described which shows how efficiency improvements (and consequently power loss reductions) can be enabled via the ...

Toshiba Electronic Devices Storage Corporation ("Toshiba") has launched the TCR1HF series of LDO regulators that deliver high voltages, a wide input voltage range, and the industry's lowest [1] stand-by current consumption. Shipment of the first three products in the new series, " TCR1HF18B," " TCR1HF33B," and " TCR1HF50B," which offer output voltages of 1.8V, ...

KAWASAKI, Japan-Toshiba Electronic Devices & Storage Corporation (Toshiba) has launched TLX9152M, an automotive photorelay with an output withstand voltage of 900V (min) that is highly suitable for application in high voltage automotive batteries. The new photorelay is housed in an SO16L-T package. Volume shipments start today.

Since 2011, Toshiba International Corporation has manufactured high-performance drive motors for hybrid electric vehicles (HEV). The state-of-the-art HEV plant spans 45,000 square feet and produces in excess of 130,000 motors annually.

In keeping with Toshiba's proven track record of innovative technology, superior quality, and unmatched reliability, the Energy Storage System combines Toshiba's proprietary rechargeable super charged lithium titanium oxide battery (SCiB(TM)) technology with the high-performance DC to AC inverter to offer a

complete long life, high-power density ...

Toshiba's 900V photorelay suitable for high-voltage automotive batteries Toshiba has introduced a new automotive photorelay capable of withstanding an output voltage of up to 900V. Updated: Aug ...

Toshiba has been recognized as a global leader in surge arrester technology for more than a century. With a range of 69 to 765 kV, the Toshiba high-voltage product offering includes gas insulated substations, porcelain, polymer-type, and transmission line

Toshiba's T300MV2 4160 V medium voltage adjustable speed drive is the most advanced drive in the industry. No other drive in the market features the latest five-level Pulse Width Modulation (PWM) with Neutral-Point Clamping (NPC) technology.

Toshiba's Traction Energy Storage System with SCiB(TM) rechargeable battery for DC Railway Power Supply Systems is an energy-saving solution equipped with Toshiba's own high-quality battery technology. TESS can not only be used for energy-saving purposes, but also as an alternative solution to building new substations and as an emergency ...

SCiB (TM) has been adopted as the high-power type battery system in the Energy Storage Park project (large scale battery system demonstration project) being carried out at the Drogenbos ...

Toshiba's 3rd generation Silicon Carbide (SiC) MOSFETs introduces a selection of both 650V and 1200V voltage products. In common with 2nd generations, Toshiba's newest generation of MOSFETs include a built-in SiC Schottky Barrier Diode (SBD) with a low forward voltage (V_F) of -1.35V (typ.), placed in parallel with the PN diode in the SiC MOSFETs, to suppress fluctuation ...

Toshiba Electronic Devices Storage Corporation ("Toshiba") has launched the TCR1HF series of LDO regulators that deliver high voltages, a wide input voltage range, and the industry's lowest ...

With Toshiba's vast experience in High Voltage (HV) Power Transmission and Distribution substations; we

are well qualified to offer you products which ranges from 72.5 kV and up to 1100 kV rated voltage and up to 8000A of rated current. ... Energy Systems & Solutions. ... Storage & Electronic Devices Solutions. Electronic Devices & Components ...

Gas Insulated Switchgear (GIS) is a switch that turns electric power flows on and off. Installed in switching stations and substation facilities, it protects stable power supply by immediately stopping and disconnecting the power flow in the event of a voltage surge or an abnormal flow due to lightning strikes, etc. These capabilities rely on SF₆--a gas that provides ...

Long-life and high-reliability SCiB(TM) enables frequency regulation using a storage battery system. The shift from coal- and oil-fired thermal power generation to renewable energy generation is ...

This PDF data sheet is for the Toshiba TC9163AN / TC9163AF High Voltage Analog Function Switch Array. About the Item. Toshiba TC9163AN / TC9163AF High Voltage Analog Function Switch Array. TC9163AN/AF are analog switch arrays for high voltage application. By inputting the specified serial data, the analog switches are controlled.

Toshiba's energy storage systems can provide 1) scalable systems up to mega size, 2) a wide variety of applications and 3) total system solutions, and can contribute solving various social ...

Such as high breakdown voltage, low power consumption and miniaturization are important in designing IH cooking heater. Toshiba provides information on a wide range of semiconductor products suitable for IH coil driving units, motor driving units, current detecting unit, etc., along with circuit configuration examples.

In recent years, saving energy in servers has become an urgent issue because of the rapid increase in server power consumption. To resolve the issue, Toshiba has developed this 48V bus compatible DC-DC converter with 1.2V/100A output. This design is a two-stage DC-DC converter capable of delivering 1.2V/100A to various devices from the 48V bus line.

The medium-scale lithium-ion battery energy storage system is designed for the purpose of energy-saving and electric load leveling and shifting. 23Ah cell Rated capacity: 23Ah, Nominal voltage: 2.3V, Dimensions: W116 x D22 x H106mm, Weight: Approx.550g

The G9000 UPS and the accompanying energy storage system are supported by Toshiba's industry-leading three-year parts and labor warranty* and a 24/7/365 hotline. This ensures that customers get the quickest possible resolution to any war-ranty or service issues that may arise.

Toshiba Electronic Devices & Storage Corporation In addition, the high thermal conductivity (l) of SiC makes it ideal as a material for high-power semiconductor devices. SiC makes it possible to create high-voltage power devices with unprecedentedly low on- resistance thanks to a heavily doped thin drift region as shown in Figure 1- 1 (b). 2.

Toshiba Electronic Devices & Storage Corporation 2.1.2. Adding an external gate-source capacitor to prevent self-turn-on When a MOSFET switches at high speed, a voltage is induced according to the ratio between its gate-drain and gate-source capacitances. The induced voltage is superimposed on its gate voltage and might cause undesired self ...

Toshiba Electronic Devices & Storage Corporation ... High side switch (8-channels) for motors, solenoids, lamp drives 1. Description TPD2015FN is a high-side switch (8-channels) with MOSFET outputs. This is the monolithic power IC that can be driven directly ... High voltage operation is possible : 40 V Low on resistance : 0.55O (max) @ V DD ...

The SolarEdge StorEdge system DC couples the solar array and energy storage to a common dual-role inverter. By maintaining a high voltage DC connection between the PV modules and the battery the StorEdge inverter hits 98% maximum efficiency. In other DC coupled systems the incoming PV voltage might be limited to 150VDC.

Toshiba Corporation (TOKYO: 6502), a company dedicated to advancing carbon neutrality through its technologies, products and services, today expanded its SCiB(TM) product offering ...

- New device is suited for high voltage automotive batteries - Toshiba Electronic Devices Storage Corporation ("Toshiba") has launched " TLX9160T," a normally open (NO) 1-Form-A photorelay suited for high voltage automotive batteries. Housed in an SO16L-T package, the new device is Toshiba's first to feature a high output withstand voltage of 1500V (min). Volume shipments ...

Target applications for the battery range from power tools and industrial application that require high voltage with a small battery pack, up to electric vehicles. Toshiba is presenting the cathode technology at The 64th Battery Symposium of Japan, which will be held at the Osaka International Convention Center, 28 to 30 November 2023.
