

What is a containerized energy storage system?

The Container Series are outdoor containerized energy storage systems for utility grid tie or C/I behind the meter applications. They are available in 10ft, 20ft, and 40ft configurations. Power and capacity range from 150kW/150kWh up to 1.5MW/ 2.2MWh. You can combine multiple units for even more capacity.

What is the power and capacity of the container series?

Power and capacity range from 30kW/50kWh to 90kW/150kWh. These solutions are modular and expandable to meet larger energy storage requirements. The Container Series are outdoor containerized energy storage systems for utility grid tie or C/I behind the meter applications.

What is a containerized maritime energy storage solution?

ABB's containerized maritime energy storage solution is a complete, fireproof self-contained battery solution for a large-scale marine energy storage.

What is energy storage cabinet?

Energy storage cabinet boasts a long lifecycle and high safety standards, providing a turnkey solution for safe and efficient urban energy grids. TCC hopes to launch a safe energy storage system that will provide future urban power grids with flexibility, resilience, and practicality in a safe and efficient manner.

How does a maritime energy storage system work?

The maritime energy storage system stores energy when demand is low, and delivers it back when demand increases, enhancing the performance of the vessel's power plant. The flow of energy is controlled by ABB's dynamic Energy Storage Control System.

How are anomalies detected in the energy storage cabinet?

Temperature sensors and smoke detectors are installed for comprehensive monitoring within the energy storage cabinet. Anomalies are detected using our in-house developed EMS system, which continuously monitors environmental temperature, humidity, and battery module details.
