Editor: Christine M. Turgeon, CPA. The Inflation Reduction Act of 2022, P.L. 117-169, signed into law on Aug. 16, 2022, is considered the largest investment in clean energy in history, providing an estimated \$663 billion of new energy-related tax credits over a ...

In detail Qualified investment. The Section 48E credit generally is 6% of qualified investment in a qualified facility or energy storage technology (defined in Section 48(c)(6)), increased to 30% if a taxpayer meets prevailing wage and apprenticeship requirements or exceptions in constructing, repairing, or altering the facility.

Section 168(e) provides favorable depreciation treatment for facilities or property qualifying for this tax credit. These facilities or property will be treated as a 5-year property for purposes of cost recovery, leaving them with lower taxable income in the earlier years of a clean energy investment. Credit is adjusted annually for inflation.

In addition to the energy efficiency credits, homeowners can also take advantage of the modified and extended Residential Clean Energy credit, which provides a 30 percent income tax credit for clean energy equipment, such as rooftop solar, wind energy, geothermal heat pumps and battery storage through 2032, stepping down to 22 percent for 2033 ...

Beginning in 2025, these new tax credits will replace the production tax credit under section 45 (the "Legacy PTC") and the investment tax credit under section 48 (the "Legacy ITC"). The proposed regulations adopt many principles for the new technology-neutral credits that are similar to those applicable under the legacy credits and ...
