

Can a large-scale storage system meet Britain's electricity demand?

Great Britain's demand for electricity could be met largely (or even wholly) by wind and solar energy supported by large-scale storage at a cost that compares favourably with the costs of low-carbon alternatives, which are not well suited to complementing intermittent wind and solar energy and variable demand.

Does Great Britain need large-scale electricity storage?

It draws on studies from around the world but is focussed on the need for large-scale electrical energy storage in Great Britain (GB) and how, and at what cost, storage needs might best be met. In 2050 Great Britain's demand for electricity could be met by wind and solar energy supported by large-scale storage.

How often should a tank/vessel be stored?

For tank/vessel storage, levelised costs are based on a cycle rate of once every three days (i.e. 120 days per year) for pressurised storage and once every week (i.e. 52 days per year) for liquid storage.

Should thermal storage be included in the UK energy system?

The inclusion of thermal storage as part of the UK energy system provides an opportunity to develop new skills, but will inevitably reduce the attention on disaggregated heating systems. It is important that thermal storage systems are sympathetically introduced to the built environment, to ensure they are accepted by the local community.

Will UK energy storage build a second phase of hydrogen storage?

A planned second phase, both in the adjacent offshore and onshore would add a further 1 billion m<sup>3</sup> of storage. UK Energy Storage will build the UK's largest Hydrogen storage site, with up to 2 billion cubic metres of hydrogen capacity providing up to 20% of the UK's predicted hydrogen storage needs in 2035.

What is a tank thermal energy store (TTES)?

In tank thermal energy stores (TTES), water is the heat storage medium. An insulated water tight envelope is required with sufficient strength to withstand the stresses imposed by the weight of the water. Partial burial underground can help alleviate this problem.
