Should I spend 2 Umbra Forma on a Warframe?

Well, that's the advantage of spending TWO UMBRA FORMA on a Warframe. Since this is a joke build, how about we take this joke a little too far. If you want to truly min-max this to its fullest potential. You'll have to use every source of power strength possible, meaning:

We agree that Titania's Tribute ability can be quite cumbersome to cast so giving it its own "fused reservoir augment" would be great. Also a complete change to her "tangled" tribute as it genuinely holds no real value as it is either a placebo or simply not functioning by not reducing enemy actions like firing and only movement by a measly 25%

Warframe concussion reservoir

On the other hand Fused Reservoir is so simple and unintrusive it feels like it should be baseline to the ability rather than costing a mod slot. Wisp main here, 100% against having the augment as part of the regular ability.

Hey. I like to propose a displeasure then a solution related to the Warframe Wisp and his augment mod "Fused Reservoir" which modifies her 1st ability adding a 4th reservoir containing the 3 main reservoir: vitality, haste and shock. In any endless type fissure, wait for Warframe buff -> place reservoir, then just keep cracking relics and wait for the the buff to eventually be on your weapons. I've done this before with partially ranked twin grakatas and a wisp build that probably only hit like 600-700 strength and it was still enough for the grakatas to actually kill quickly
