

What are the energy storage warranty terms

What are the different types of storage warranty?

In the energy storage sector, there are two main types of warranties: a product warranty, which is a guarantee against defects, and a performance warranty. In this context, we do not focus on the product warranty as much.

Which battery storage system has the strongest warranty?

Comparisons should focus on product warranty terms, end of warranty capacity, labor warranty terms, and transferability. Based on our ranking system, SolaX Power has the strongest overall warranty. Why are battery warranties important? A battery storage system is a decades-long investment that a warranty can help protect.

How does EnergySage score a battery warranty?

To help simplify the process for you, EnergySage has developed a scoring system that focuses on essential factors like product and power warranty terms, labor, shipping, and inverter coverage, and how easy it is to transfer ownership. Let's dive into some of the most popular battery brands on EnergySage and see which offers the best warranties.

What is a battery warranty?

Also known as a materials warranty, a battery's product warranty covers the integrity of the equipment itself. If your battery has a defect or mechanical issue, if it breaks, or experiences unreasonable wear and tear, that's where your product warranty comes into play.

Does a battery storage system need a warranty?

A battery storage system is a decades-long investment that a warranty can help protect. The less power your system stores, the more your home may need to draw from the utility company, which eats into your savings. A good warranty ensures that if your battery experiences a problem, that it will be replaced and your investment will be protected.

What do insurance companies look for in a storage company?

Insurers consider balance-sheet support and look for a developer to make a guarantee that is similar, if not stronger. In the context of energy storage, there are usually two types of warranties. First, there is a product warranty, which is a guarantee against defects.

For example, if your battery company provides a throughput warranty of 30 MWh, this means that the warranty is valid until the battery stores and delivers 30 MWh or 30,000 kilowatt-hours (kWh) of energy. Similar to a cycle life warranty, throughput warranties typically only apply if your battery delivers a set amount of energy before its ...
