

Whole house energy storage customization

A basic SimpliPHI LFP system with an inverter and two battery packs costs about \$12,000. If you want whole-house energy or are off the grid, consider a battery "cabinet" of six or more units, at \$15,000 and up, exclusive of solar panels. Both types are eligible for the 30 percent energy tax credits enacted in 2022.

Batteries aren't for everyone, but in some areas, a solar-plus-storage system can offer higher long-term savings and faster break-even on your investment than a solar-only system. The median battery cost on EnergySage is \$1,133/kWh of stored energy. Incentives can dramatically lower the cost of your battery system.
