Defines guidance for an objective evaluation of alkaline energy storage technologies by a potential user for a stationary application. To be used in conjunction with IEEE Std 1679, IEEE Recommended Practice for the Characterization and Evaluation of Energy Storage Technologies in Stationary Applications.

It makes sense that these types of energy storage systems are only permitted to be installed outdoors. One last location requirement has to do with vehicle impact. One way that an energy storage system can overheat and lead to a fire or explosion is if the unit itself is physically damaged by being crushed or impacted.
