

# Winning the bid for energy storage cells

Which solar-plus-storage projects were bidding in Germany's latest innovation auction?

All the bidding projects from Germany's latest innovative auction were a combination of solar with energy storage. Image: Convergent Energy + Power. Germany's latest innovation auction has awarded contracts to 32 solar-plus-storage projects with a cumulative capacity of 408MW.

Should project developers buy energy storage systems?

It's no secret that many project developers purchase energy storage systems only to meet the mandatory integration policy. These developers are hungry for low-cost storage products on the market with little care about the quality and performance, as they know those systems may never be used.

Why is energy storage important?

Winners get a "fixed market premium" paid for their energy as well as market revenues they can earn. Success for project proposals combining solar PV with battery storage in Germany's latest multiple technology tenders for renewable energy are proof of the importance of energy storage.

What is the biggest bottleneck in the energy storage supply chain?

Back in 2021 and 2022, battery supply was the biggest bottleneck for the energy storage supply chain. Stationary energy storage system (ESS) integrators and developers spent a considerable amount of time negotiating contracts with battery manufacturers who were instead prioritising automaker clients.

How are Chinese and Western companies improving energy storage systems?

While Chinese players are competing on price, Western companies are focusing on improving the safety, availability and performance of energy storage systems. This is being achieved by enhancing software expertise and upgrading system designs.

DMRE has also extended the bid submission deadline for the second bid window of BESIPPPP, from 30 April 2024 to 6 June 2024, and done the same for the seventh bid window of the separate Renewable Energy Independent Power Producer Procurement Programme (REIPPPP). BESIPPPP round two will procure 615MW/2,460MWh.

Reliance New Energy and Rajesh Exports will get PLI for setting up 5 GWh of manufacturing capacity. Reliance had bid for 20GWh, and the remaining 15GWh has been waitlisted, the statement said. The companies will make a direct investment of around Rs 45,000 crore in advanced chemistry cell battery storage manufacturing projects, the statement said.

Reliance New Energy Solar, Ola Electric Mobility, Hyundai Global Motors, and Rajesh Exports have been approved by the Ministry of Heavy Industries for receiving incentives under the production-linked incentive (PLI) program for advanced chemistry cells (ACC) for energy storage, according to Mercom sources. Ola and

Hyundai will receive incentives for ...

A recently published indicative auction calendar foresees at least 10GW of PV capacity and 8.5GW of wind to be auctioned in Spain in the next five years, with renewables projects paired with storage allowed to participate. While energy storage supported bidders in last year's solar auction in Portugal - which saw the majority of bids ...

Gensol Engineering Ltd has won GUVNL's 250 MW/ 500 MWh standalone BESS tender (Phase III). This marks its yet another win for the EPC developer in the battery storage space after securing 70 MW in GUVNL's Phase II 250 MW/500 MWh standalone BESS tender in March this year. The company won the latest GUVNL BESS tender by quoting a ...

Huasun Secures 500MW HJT Bid of China Huaneng's 2024 Photovoltaic Module Procurement . Huasun Secures 500MW HJT Bid of China Huaneng's 2024 Photovoltaic Module Procurement 2024.03.14 Huasun Energy, a leading player in the heterojunction (HJT) solar sector, has achieved a significant milestone by winning a major contract in China Huaneng Group Co., ...

Winners of the procurement with BESS bids include Boralex, a Toronto Stock Exchange-listed renewable energy developer, with two projects: Hagersville Battery Energy Storage Park, a 300MW, 4-hour duration (1,200MWh) project in Ontario's Haldimand County and Tilbury Battery Storage Project, which will be a 80MW/320MWh system in the Municipality ...

Jason Goodhand leads the engineering, advisory, certification and testing group's energy storage practice, with around 80 subject matter experts working across five global regions, modelling, testing, and carrying out due diligence on storage equipment and projects. As reported by Energy-Storage.news when the Battery Scorecard was published, the questions ...

An energy storage business representative from an unnamed listed company told 36Kr that the cost of battery cells accounts for a major proportion in energy storage systems. In a 0.5C system, the cost of battery cells can account for up to 90%.

It also followed a March tender win with GUVNL for Gensol, in which its winning bid for a 70MW/140MWh was IR448,996/MW/month, while fellow winner and second-lowest bidder, IndiGrid, entered a bid at IR449,996/MW/month. IndiGrid, which announced its win in March, received a GUVNL letter of intent (LOI) for its 180MW/360MWh project.

Eskom and the South African government are looking to energy storage to shore up the grid and integrate more renewables through several procurement programmes. One is the Risk Mitigation IPP Procurement Program (RMIPPPP) for solar and storage, for which Saudi-based IPP ACWA Power recently won a project with a 1,200MWh BESS.

# Winning the bid for energy storage cells

In this project, BYD (Build Your Dreams) and Nachuang New Energy jointly won the bid. The indicators include: NFPP specific capacity ranging from 92 to 115mAh/g, with a ...

The weight average winning bid in this round was EUR46,680/MW/year. Research firm LCP Delta wrote a deep-dive into the dynamics which would play out in the second round for Energy-Storage.news in September. Energy-Storage.news" publisher Solar Media will host the 9th annual Energy Storage Summit EU in London, 20-21 February 2024. This year it ...

In the past three months multiple BESS (Battery-based Energy Storage system) tender results have pointed to yet another mini-disruption in the fast-evolving Indian renewable energy sector. Energy storage targets for 2028 might be a lot closer in 2026 itself. The price drops have been attributed primarily to falling lithium cell costs, which have led to [...]

Over a gigawatt of bids from battery storage project developers have been successful in the first-ever competitive auctions for low-carbon energy capacity held in Japan. A total 1.67GW of projects won contracts, including 32 battery energy storage system (BESS) totalling 1.1GW and three pumped hydro energy storage (PHES) projects totalling 577MW.

In the field of energy storage, CATL's cumulative winning/signing of energy storage orders in 2023 is about 100GWh. And in 2021 (16.7GWh, global market share of 24.5%), 2022 (53GWh, global market share of 43.4%), 2023 (as of Q3:50.37GWh, global market share of 38.5%) shipments ranked first in the world for three consecutive years.

Meanwhile, the remaining EUR49.75 million is intended for new projects in Romania that would add solar PV cell and module (panel) production, assembly and recycling capacity to the tune of at least 200MW per year by mid-2026. Bids could include any combination of polysilicon or wafer production, or assembly of finished cells and modules ...

During the price war, manufacturers' profitability is expected to bottom out. According to SMM, the price of 280Ah energy storage cells dropped from 0.97 RMB/Wh in early 2023 to 0.45 RMB/Wh in December 2023, driving the average bid price of 2h energy storage EPC to drop from 1.9 RMB/Wh to 1.4 RMB/Wh.

Wood Mackenzie's "China grid-scale winning bid price tracker" shows that the average bid price of 2-hour grid-scale battery energy storage systems reached US\$106.4/kWh in Q1 2024,...

The tender also establishes Pumped Storage technology as the preferred and lowest cost long duration energy storage solution. 8. The winning bid translates into unit storage charges of ~USD/MWh 58 on a single cycle per day basis, a remarkable feat in view of the storage charges discovered in another recent energy storage procurement tender based on

?Sodium-ion Batteries: BYD and Nachuang Win the Bid for NFPP Energy Storage R& D Project?On July

## Winning the bid for energy storage cells

17th, the Shaoxing Institute of New Energy and Molecular Engineering at Shanghai Jiao Tong ...

SECI declared Swelect Energy Systems, Grew Energy and Renew Photovoltaics Pvt Ltd as winners for the bid. The SECI tender had asked for bids for the manufacturing, testing, packaging and forwarding, supply and transportation of 400 MWp of Domestic Content Requirement (DCR) mandates solar modules with DCR solar cells.

Trina's cells include 306Ah and 314Ah large-format prismatic LFP cells, currently manufactured outside the US, but the company said Elementa 2 Elevate's supply chain is integrated in alignment with North American market requirements. The company aims to ramp up its total energy storage manufacturing capacity to more than 20GW by the end of ...

The auction attracted highly competitive bids, with tariffs reaching as low as INR 3.41/kWh. Pace Digitek Infra secured the lowest bid, winning a 100 MW project at INR 3.41/kWh. JSW Neo Energy clinched 500 MW at INR 3.42/kWh, although this was slightly lower than their initial bid for 600 MW.

That includes everything from increasingly standardised and modular hardware for BESS plants to managing their market participation and operations and maintenance. As reported by Energy-Storage.news yesterday, a project for which it just signed a deal in Australia will be the first to put all of those pieces together at one site from end-to-end. Somehow ...

Prozeal Green Energy bid INR3.13 billion (~\$37.2 million) to win the project. ... from making wafers to assembling solar cells into modules, must be carried out at the facilities of Indian manufacturers. ... The combination of solar power generation and energy storage represents a significant advancement in renewable energy infrastructure for ...

It follows the staging last year of a predecessor, the Expedited LT1 RFP, which saw the award of contracts to 881MW of energy storage projects in two tranches. The first concluded a year ago, in May 2023, with 739MW of contracts awarded, and the second in June 2023, with 142MW of winning energy storage bids.

Just as we reported from the event last year, exactly how to qualify for the 10% domestic content adder to the 48E ITC for using domestically-produced BESS is still unclear, and further guidance is expected on it soon. "Terribly important" to access 45X credit The US\$35 per kWh 45X tax credit for battery cell manufacturing (45X) and associated US\$10 per kWh for ...

The news emerged as engineering company Gensol announced a win in a tender of similar size in the state of Gujarat. The new NTPC tender is for 150MW/300MWh of battery storage at the site of an NTPC solar PV plant in the Madhya Pradesh city of Gadarwara, and 100MW/200MWh at one of the IPP's thermal power plants in Solarpur, Maharashtra. ...

Another round is planned for April 2025, with the goal of allocating an additional 300 MW. These tenders are

## Winning the bid for energy storage cells

part of the country's 1 GW energy storage auction program. REGlobal's Views: Greece is witnessing a large uptake of renewables and, is thus, promoting energy storage to integrate this clean energy for grid stability.

This time out, there were no long-duration energy storage (LDES) winners. Instead, two of the three selected BESS projects were 2-hour, and the third a 4-hour duration resource. ... The forecast LTESA cost of the winning bids, on capacity weighted average basis, was AU\$32,000 (US\$20,900) present value (PV)/MW/year, while the annuity payment cap ...
