In terms of operating revenue structure, sales of waterproof materials and waterproofing construction together accounted for 92.05%, of which 82% from the sales of waterproof materials and 10.05% from waterproofing construction; in terms of products, waterproof coiled materials accounted for 49.37% of the operating revenue, and waterproof ...

Product presentation: "YUHONG" Brand SAM-921 Wet Installed cross-laminated self-adhesive waterproof membrane is a composite waterproof material formed through cohesive combination between the strong adhesive sealing layer and the strong cross-laminated film at the entrance. The strong adhesive sealing layer should be reactive to cement mortar.

Product presentation: "YUHONG" brand SAM-920 Self-adhesive Polymer Modified Bitumen Waterproof Membrane without Reinforcement is based on the self-adhesive rubber bitumen which consists of SBS synthetic rubber, tackifier and high quality road petroleum asphalt, and the upper surface material of high and low temperature resistant perfect polyester film (PET) or ...

Product presentation: "YUHONG" brand SPU-301 One Component Polyurethane Waterproof Coating is made out of the main materials of isocyanate and polyether polyol, together with various auxiliaries and fillers by polyreaction, coating on the waterproof base layer, after chemical reaction of NCO terminal group of polyurethane prepolymer and moisture in air, it forms a ...

Product presentation: "YUHONG" brand High Elastic Thick Acrylate Waterproof Coating is a thick single-component water-base macromolecule waterproof coating film made scientifically out of the base of high quality modified acrylate copolymerization emulsion, and multiple auxiliary and filler.

Beijing, China - August 29, 2019 - BASF and Oriental Yuhong Waterproof Technology Co. Ltd. (Oriental

Yuhong waterproof energy storage

Yuhong) have signed a Joint Development Agreement (JDA) in China to further strengthen their partnership to co-develop the next-generation of environmentally-friendly waterproofing solutions. The partnership intends to reinforce the strategic cooperation in ...

Get the latest Beijing Oriental Yuhong Waterproof Technology Co., Ltd. (SHE: 002271) stock price quote with financials, statistics, dividends, charts and more. ... and sealing materials. It also engages in waterproof engineering, civil construction materials, energy saving and heat preservation materials, non-woven fabric, architectural ...

Product presentation: "YUHONG" brand HCA-108 Roof Crylic Acid High Elastic Waterproof Coating is made out of the base of acrylate copolymerization emulsion, together with high quality pigment, filler and the selected multiple-functional auxiliary .This product has excellent elasticity, bonding strength and ultraviolet resistance, mainly used for metal directly exposed roofing ...

"YUHONG" brand PMH-3040 High Density Polyethylene Self-Adhesive Film Waterproof Membrane (Briefly, HDPE Self-Adhesive Film Waterproof Membrane), this is a waterproof membrane which is specially designed for underground engineering constructions with international advanced technology, it can bind the later cast concrete form a firm structure. It ...

Transport and Storage · Storage and transportation, different types of products, specifications stacked separately, avoid sun and rain, pay attention to ventilation, storage temperature should not be higher than 45ºC, horizontal storage stacked height of not more than five layers, prohibit contact with acid, alkali, oil and organic solvents.

Beijing Oriental Yuhong Waterproof Technology Co., Ltd. specialized in the development and marketing of sealing solutions and systems for the construction sector. Products include self-adhesive cover sheets, synthetic macromolecule sheets, waterproof coatings, rigid waterproof materials and sealing materials.

We are making efforts to realize the dream of . Oriental Yuhong. Oriental Yuhong, incorporated in 1995, has grown into an outstanding building material systems service provider in the past two decades, by providing high-quality and complete system solutions for tens of thousands of important infrastructure construction projects, industrial buildings, civil buildings and ...

Oriental Yuhong entered building waterproofing industry in 1995. In the 20-year development course, it has been devoted to providing highquality and perfect waterproofing solutions for important infrastructure construction projects, industrial buildings, civil ...

Revenue of 14.978bn yuan for Oriental Yuhong in the First Three Quarters of 2020. On the evening of October 26 th (Beijing time), Beijing Oriental Yuhong Waterproof Technology Co., Ltd. (SZ002271) released its third quarter report of 2020. In the first three quarters, Oriental Yuhong achieved an operating revenue of USD 2.22 billion, a year-on-year increase of 16.15%.

Beijing Oriental Yuhong Waterproof Technology Co Ltd is engaged in the research and production of waterproofing solution systems. ... Oriental Yuhong has also invested in many other fields such as non-woven fabrics, building energy efficiency, mortar, and energy and chemical industry. Geographically the activities are carried out through China ...

Product presentation: "YUHONG" brand BPS-202 Water-Based Bitumen Primer is made of macromolecule-polymer modified emulsified bitumen, mainly used for base treatment prior to sheet material waterproof construction to increase the bonding strength between sheet material and base, and it has functions to seal pores of mortar base and stop vapor permeation.

Product presentation: "YUHONG" brand SPUA-351 Spray Polyurea Elastic Coating is a double-component elastic coating which is formed by mix-spraying with component A and component B. Component A is a semi-prepolymer obtained by reaction of isocyanate and oligomer glycol or ternary alcohol; Component B consists of amino resin and hydroxyl resin, liquid amine chain ...
