

What is a cooperation agreement between Zambia and DRC?

The Cooperation Agreement is expected to provide a framework for bilateral cooperation on the initiative to develop the battery value chain as well as strengthen collaboration between Zambia and DRC. Once actualised, the combined strategy will create jobs for Congolese and Zambians and boost economies of the two countries.

Can Zambia create a competitive electric vehicle battery value chain?

Mr. John Mulongoti, Permanent Secretary-Investments and Industrialisation, MCTI, in his opening remarks shared Zambia's resolve to create a competitive Electric Vehicle Battery value chain leveraging on the presence of the critical minerals, tailored towards sustainable development and inclusive growth.

How does the MoU support DRC & Zambia?

The MoU supports the DRC and Zambia's goal of building a productive supply chain, from the mine to the assembly line, while also committing to respect international standards to prevent, detect, and take legal action to fight corruption throughout this process. RELATED: First demonstration of EV pilot battery passports successful

What is Zambia & DRC 'joint initiative'?

Lusaka, 05 October 2023 - "Zambia and the Democratic Republic of Congo (DRC), together are home to at least 70 percent of critical minerals required to produce Battery Electric Vehicle (BEV) and precursors. The Joint Initiative is expected to unlock economic potential and strengthen the value chain in the both countries.

Will private sector play a role in achieving Zambia's manufacturing agreement?

"We fully welcome and support the Operationalisation of this agreement" Mr. Masuwa said. Zambia Association of Manufacturers president Ashu Sagar said the private sector will play its role in seeing to it that the programme succeeds.

Can the United States meet the DRC and Zambia's economic and industrial needs?

With the MOU, the United States also aims to help meet the economic and industrial needs of the DRC and Zambia. Yet the MOU constitutes a first-step instrument and political signaling tool. Its successful implementation will depend on specific requirements and input from all three countries.

Mr Mulenga who signed on behalf of Zambia said the agreement also guides the implementation of the initiative and signifies a huge milestone in the cooperation between Zambia and the DRC on the ...

Witness the dawn of a sustainable energy era as GEI Power from Zambia and YEO from Turkey join forces to develop a US\$65 million Solar PV Plant with Battery Energy Storage. This groundbreaking partnership aims to revolutionize Zambia's energy landscape while propelling Turkey's expertise in clean energy solutions.

The 2022 cooperation agreement laid the foundation for a joint strategy to boost the economies of Zambia and the DRC by developing value chains for electric vehicle batteries and components. With around 70% of the minerals required for electric vehicle battery production, including cobalt, copper, and nickel, the two countries are well ...

In response to Zambia's current situation of power shortages and urgent need for energy sources, continuous efforts should also be made in technological solutions such as micro-grid photovoltaic and energy storage, he said. China, as a leader in the green energy revolution, has become an important partner to Zambia and Africa's energy transition.

The United States, Zambia, and the Democratic Republic of Congo (DRC) signed a memorandum of understanding (MOU) on the electric vehicle (EV) batteries industries in December 2022. This agreement, "Memorandum of Understanding among the United States of America, the Democratic Republic of the Congo, and the the Republic of Zambia Concerning ...
